# COMPOSITES

## Index to Volume 1

*Advisory Editorial Board*

**D. H. Bowen**, Atomic Energy Research Establishment, Harwell, Didcot, Berkshire, England

**A. Kelly**, National Physical Laboratory, Teddington, Middlesex, England

**R. M. Ogorkiewicz**, Imperial College, Exhibition Road, London SW7, England

**B. Parkyn**, Scott Bader and Co Ltd, Wollaston, Wellingborough, Northamptonshire, England

**L. N. Phillips**, Royal Aircraft Establishment, Farnborough, Hampshire, England

**B. R. Steele**, Building Research Station, Garston, Watford WD2 7JR, England

*Overseas correspondents*

*Australia* **L. M. Gillin**
Aeronautical Research Laboratories, 506 Lorimer Street, Fishermen's Bend, Melbourne, Australia

*France* **M. Sindzingre**
Professor, Laboratoire des Materiaux de l'Ecole des Mines de Paris, SNECMA, 91 Corbeil-Essonne, France

*German Federal Republic* **W. Brockmann**
Arbeitsgruppe Angewandte, Materialforschung in der Fraunhofer-Gesellschaft, 282 Bremen-Lesum, Lesumer Heerstrasse 36, Munchen, Germany

*Israel* **S. R. Rosen**
Professor of Materials Engineering, The Technion, Haifa, Israel

*Italy* **M. Bruzzone**
Snam Progetti SpA-LSR, Servizio Polimeri, 11 Responsabile, Laboratori Studi E Ricerche, DI S. Donato Milanese, Italy

*USA*
**A. G. H. Dietz**
Department of Building Engineering, Massachusetts Institute of Technology, Building E21, 77 Massachusetts Avenue, Cambridge, Massachusetts, 02139, USA

**G. Lubin**
Department of Reinforced Plastics, Grumman Aircraft Engineering Corp, Plant 12, Dept 444, Bethpage, LI, New York, USA

**D. V. Rosato**
Plastics World, PO Box 68, Waban, Massachusetts 02168, USA

Published Quarterly by IPC Science and Technology Press Ltd, 32 High Street, Guildford, Surrey, England

## Authors

Allen, H. G., Analysis of sandwich panels: the significance of shear deformation 215
Allen, H. G., The fabrication and properties of glass reinforced cement 19
Aveston, J., Fibres of high thermal stability 296
Bagg, G. E. G., Evans, M. E. N. and Pryde, A. W. M., The glycerine process for the alignment of fibres and whiskers 97
*Bishop, P. H. H.*, Open pattern winding 160
*Cook, J., Mechanical testing of* whiskers 176
*Cooper, G. A., Forming processes for metal matrix composites 153*
Covell, Pauline, A review of British Standards for composites: Part 2. Polyester and epoxide resin systems. 359
*Dimmock, J. and Abrahams, M.*, Prediction of composite properties from fibre and matrix properties 87
Dimmock, J. and *Spedding, C.* E., Creep testing of plastics composites 356
*Hammant, B. L.*, Flexural stress relaxation properties of *thermoplastics and composite* materials 150
Hazell, E. A., Measurement of the effects of strain rate on mechanical properties of composites: Part 1. Instrumented Hounsfield tensometers 362
Hollingsworth, B. L., New fibre-filled thermoplastics: Part 1. The future for asbestos 28
Hollingsworth, B. L., New fibre-filled thermoplastics: Part 2. Reinforcement by high modulus fibres 80
Jay, R., PVC coated steel sheet 290
*Judd, N. C. W., Electroless* deposition of copper and nickel on carbon fibres 345
Knight, B. W., The technique of filament winding 228
Maddock, B. J., Superconductive composites 104
*Markham, M. F., Measurement* of the elastic constants of *fibre composites by ultra*sonics 145
*Michaels, A. S., Composition* stone 306
Mountifield, J., Forming processes for glass fibre and resin and other materials 41
*Mowforth, E., Non-linear bend*ing of a random-fibre lam*inate 76*
Nutt, W. O., An evaluation of a *polymer cement composite* 234
Owen, M. J., Fatigue testing of fibre reinforced plastics 346
Owston, C. N. and Conor, P. C., Failure mechanisms in carbon fibre reinforced polymers and their relation to ndt 268
Parratt, N. J., Silicon carbide as a reinforcement 141
Parratt, N. J., Whisker alignment by the alginate process 25
Paton, W., Carbon fibre in sports equipment 221
Payne, A. R. and Whittaker, R. E., Reinforcement of rubber with carbon black 203
Pearce, D., Designing in carbon-fibre reinforced metals 13
Phillips, L. N., Forming processes for carbon fibre and resin 101
*Phillips, L. N., Improved racing-*car bodies 50
*Phillips, L. N. and Rogers, K. F.*, Polyimide resins for carbon fibre composites 286
Pullen, W. J., The rotating cantilever fatigue test 239
*Sambell, R. A. J., The tech*nology of ceramic-fibre/ *ceramic-matrix composites 276*
Stone, M. H., Bond penetration by liquids 164
Stretton, R. H. and Covell, P., Wire sheet as a reinforcement in resin matrices 171
Thomas, J. A. G., Sandwich *structures by injection* moulding 366
*Wells, T., Specifications for composites* – Introduction 301
*Wildman, D., Forming processes* for glass fibre and resin-contact mouldings 35

## Titles

Analysis of sandwich panels: the significance of shear deformation, Allen, H. G. 215
Bond penetration by liquids, Stone, M. H. 164
Carbon fibre reinforced racing canoes and kayaks 112
Carbon fibre in sports equipment, Paton, W. 221
Composite material for school partitions 168
Composition stone, Michaels, A. S. 306
Creep testing of plastics composites, Dimmock, J. and Spedding, C. E. 356
Designing in carbon-fibre-reinforced metals, Pearce, D. 13
Electroless deposition of copper and nickel on carbon fibres, Judd, N. C. W. 345
An evaluation of a polymer cement composite, Nutt, W. O. 234
The fabrication and properties of glass reinforced cement, Allen, H. G. 19
Failure mechanisms in carbon fibre reinforced polymers and their relation to ndt, Owston, C. N. and Conor, P.C. 268
Fatigue testing of fibre reinforced plastics, Owen, M. J. 346
Fibres of high thermal stability, Aveston, J. 296
Filament wound spherical tanks 308
Filamentary superconducting composites, Wilson, M. N. 341
Flexural stress relaxation properties of thermoplastics and composite materials, Hammant, B. L. 150
A forming process for Microwire 167
Forming processes for carbon fibre and resin, Phillips, L. N. 101
Forming processes for glass fibre and resin-contact mouldings, Wildman, D. 35
Forming processes for glass fibre and resin and other materials, Mountifield, J. 41
Forming processes for metal matrix composites, Cooper, G. A. 153
The glycerine process for the alignment of fibres and whiskers, Bagg, G. E. G., Evans, M. E. N. and Pryde, A. W. M. 97
Improved racing-car bodies, Phillips, L. N. 50
Irrigation project in West Pakistan 94
Measurement of the effects of strain rate on mechanical properties of composites: Part 1. Instrumented Hounsfield tensometers, Hazell, E. A. 362
Measurement of the elastic constants of fibre composites by ultrasonics, Markham, M. F. 145
Mechanical testing of whiskers, Cook, J. 176
Microwire 307
New fibre-filled thermoplastics: Part 1. The future for asbestos, Hollingworth, B. L. 28
New fibre-filled thermoplastics: Part 2. Reinforcement by high modulus fibres, Hollingsworth, B. L. 80
Non-linear bending of a random-fibre laminate, Mowforth, E. 76
Open pattern winding, Bishop, P. H. H. 160
Polyimide resins for carbon fibre composites, Phillips, L. N. and Rogers, K. F. 286
Prediction of composite properties from fibre and matrix properties, Dimmock, J. and Abrahams, M. 87
PVC coated steel sheet, Jay, R. 290
Reinforcement of rubber with carbon black, Payne, A. R. and Whittaker, R. E. 203
A review of British Standards for composites: Part 1. Glass fibre for reinforcement 303
A review of British Standards for composites: Part 2 Polyester and epoxide resin systems, Covell, Pauline 359
The rotary fibre classifier 114
The rotating cantilever fatigue test, Pullen, W. J. 239
Sandwich structures by injection moulding, Thomas, J. A. G. 366
Ships of GRP 52
Silicon carbide as a reinforcement, Parratt, N. J. 141
Sparkling GRP beach buggy 300
Specifications for composites – Introduction, Wells, T. 301
Superconductive composites, Maddock, B. J. 104
The technique of filament winding, Knight, B. W. 228
The technology of ceramic-fibre ceramic-matrix composites, Sambell, R. A. J. 276
Whisker alignment by the alginate process Parratt, N. J. 25
Wire sheet as a reinforcement in resin matrices, Stretton, R. H. and Covell, P. 171

## Book reviews

American Society for Testing: Interfaces in composites, ASTM STP 452 242
Carroll-Porczynski, C. Z., Advanced materials 182
Dietz. A. G. H. (Editor), Composite engineering laminates 182
Gaylord, M. W., Koppers reinforced plastics – theory and practice 308
Gillam, E., Materials under stress 120
Parker, Harry, Simplified design of reinforced concrete 54
Penn, W. S., GRP technology 54
Schwartz and Schwartz (Editors), Fundamental aspects of fibre reinforced plastics composites 120
Yurenka, Stephen (Editor), Orientation effects in the mechanical behaviour of anisotropic structural materials 55

## Conference reports

Advances in polymer blends and reinforcement, Leicestershire 118
Air force materials symposium 1970, Florida 309
Deterioration of metal/plastics composites, London 245
Dielectric materials, measurement and applications, Lancaster 369
Fibres for composites: strength, structure and stability, Brighton 58
Fibre technology in engineering, Melton Mowbray 313
Materials at interfaces, Nottingham 249
Materials in leisure and sport, Worcester 119
Micro 70, London 370
National Aeronautics and Space Engineering and Manufacturing Meeting, California 371
Polymers in high-performance applications, London 56
Reinforced thermoplastics, Solihull 372
Seventh International Reinforced Plastics Conference, Brighton 375
Strong fibrous solids, London 244
Testing fibrous composites for mechanical properties, Teddington 310
The 25th Anniversary Conference of the Reinforced Plastics/Composites Division of the Society for the Plastics Industry, Washington 246
The 1969 Lord Sempill Memorial Paper. The Development of fibre reinforced composites for gas turbines, Presented by H. E. Gresham, London 56

## Abstracts

Abstracts of Patents 121, 183, 250, 314, 379
Abstracts of Journals 60, 123, 185, 153, 317, 383
